SELF-SERVICE WEBACCESS INTERNET KIOSK

How does it work?

The user is prompted to insert cash or coins; once the preconfigured amount has been deposited, the kiosk provides access to all its services. The session automatically ends after the allocated time is exhausted and the kiosk then reverts to the advertisement display mode.

Several optional peripherals available:

- USB for storage.
- A4 Printer
- Web camera
- CD burner

Software applications and services are completely configurable with optional remote management capability.

Unique Features

- Unique European design meeting EV specs.
- Front modular access for ease of maintenance.
- Vandal proof handset for use as internet telephone.
- Low maintenance fan less thin client technology.
- Option of touch screen or metal keyboard with trackball.
- Space for built-in optional UPS.

Technical Data

Customer Interface:

- 15" bright TFT colour LCD monitor or touch screen with 6mm toughened glass.
- All metal keyboard with trackball meeting IP65 splash proof standards.
